

Development of Intranet Portal

The Client

Founded in 1952 is ranked as one of the largest environmental firms in the US. The Client is an award winning general engineering contractor specializing in water and wastewater facilities, treatment plants, water reclamation facilities, solid waste recycling facilities, pump stations, reservoirs and hydro electric generating facilities.

Business Need

The Client wants to develop an intranet portal to collaborate within the organization for maintaining department wise employee information, department calendars, employee leave management, sharing project documents and tracking employee training within the organization.

Solution

With the specifications provided by the Client, Microexcel made an analysis and created Master pages, documents and project related information required for the Client.

Platform & Technical Tools

- ASP.NET
- SharePoint Server 2007
- SharePoint Designer
- C#
- Visual Studio and SQL Server.

Challenge:

The challenge for Microexcel was to interact with a variety of departments consisting of multiple disciplines to know their needs and prepare the portal to the satisfaction of all the users and as well as for the management.

Development of Intranet Portal

Benefits

The Client can now easily collaborate with various departments for the purpose of:

- Maintain department wise information and its calendars
- Effectively manage employee leave process
- Sharing of project documents and tracking employee training

Testimonial

“One of the reasons for us to become an award - winning general contractor and design builder was the way how all our departments collaborated with each other. And this is due to the Intranet Portal created by Microexcel. Thanks to them, we have become an innovative force in the industry”
