

Leverage the Best of SAP Innovations

Whether your company is adopting new SAP innovation or expanding your SAP footprint globally or just starting your SAP journey, it takes a proven partner with deep expertise to help optimize that investment. Microexcel is a global partner that can help your company leverage the best of SAP's innovations to boost operational efficiency and streamline business processes from the shop floor to the executive board room.

Microexcel's SAP Center of Excellence (CoE) offers comprehensive services that cover the entire SAP life cycle and delivers expert, high value solutions, services and packaged applications that help companies create distinctive capabilities, simplify complex processes and establish a strong enterprise IT landscape to sustain profitable growth.

Comprehensive Solutions and Services Portfolio That Align to Future Business Needs

We provide the **advisory, operational, and transformational services** that help you make your core capabilities more agile, efficient, innovative, and competitive. With deep insight into your business and systems, we can help you adopt SAP and then evolve and apply the technology in pace with your requirements and goals. By unlocking the business capabilities that drive growth, improve ROI, and lower risks, we help you flex your business to meet market dynamics faster than your competitors.

As an SAP partner of choice for many leading, global organizations, Microexcel helps customers stay ahead of the technology curve by realizing the benefits of **in-memory computing (HANA), cloud, mobility, Big Data, and analytics.**

- ▶ Strategic Roadmaps
- ▶ Solution Implementation
- ▶ Global Rollouts
- ▶ Migration and Upgrades
- ▶ Testing
- ▶ Strategic Sourcing
- ▶ Solution Development
- ▶ Cloud Implementation
- ▶ ExcelCare™ - Application Management Services

ExcelSAP – Repeatable, Standardized, Rapid Implementation Methodology

ExcelSAP is Microexcel's proprietary, rapid implementation methodology for SAP that is based on Scrum principles. With repeatable and standardized approaches, ExcelSAP reduces the implementation time significantly, by minimizing two project phases: blueprinting and development. Through years of successful project implementations, Microexcel combines best practices from SAP as well as our own

high standards and leverages reusable project assets such as templates, tools, and other accelerators. ExcelSAP accelerates project durations by identifying common business scenarios across key verticals and executes those processes as standards, unless customization is needed. This allows Microexcel to preview the processes to customers ahead of time for user acceptance, instead of waiting towards the end of the project, which can lead to costly changes. ExcelSAP benefits customers with dramatic savings without sacrificing high standards and best practices.

Microexcel SAP Software Footprint
