

**SAP® Business Intelligence  
and Business Warehouse Services**

*Research shows that in 2015, 2.5 quintillion bytes of data was being created every day. The massive volume and speed of data creation and the difficulty of harnessing and using it intelligently, is posing enormous strain on organizations. Knowing how to aggregate, analyze, and monetize this data-surge has become a top-priority within corporations.*

Microexcel can help organizations to shift towards a modern Business Intelligence (BI) and Analytics platform with robust self-service of analytics data to derive deeper insights from diverse data sources. As an SAP partner, we have a dedicated Business Intelligence (BI) and Business Warehouse (BW) practice with deep expertise in IT business processes, advanced analytic techniques and development of real-world applications.

## Rely on Microexcel's Deep Expertise Around BI and Analytics:

Our comprehensive portfolio of BI services enables you to select the scope of services that are right for your business. Our comprehensive services include:

- ▶ **Reengineering Services:** Redesign and reengineering services to help you frame and implement your BI strategy, secure a long term sustainable BI Architecture, and optimize your current BI environment
- ▶ **Design and Development Services:** Comprehensive, end-to-end design and development of data quality, ETL frameworks, enterprise reporting, ad hoc and analysis reporting, dashboards and visualization from any source system
- ▶ **Maintenance Services:** Ensure smooth operations, reusability, performance optimization and reliability of your enterprise BI solutions while aligning BI investments with business objectives through our SAP BusinessObjects BI Center of Excellence
- ▶ **Emerging Technologies:** Take advantage of innovative and leading technologies, including in-memory computing (SAP HANA) and mobile BI

## Consulting and Advisory

We leverage our experience from successful BI initiatives to help you derive maximum value and unleash the true potential of your BI solutions. Using a design thinking approach, we can help you create a simple strategy and road map for how data, technology, organizational culture, processes and people come together to bring about business value.

- ▶ BI Strategy and Roadmap Services
- ▶ BI and BW Health Check Services
- ▶ BI Architecture and Design Optimization Services
- ▶ BW Upgrade Assessment
