

Microsoft Offerings

Microexcel is an approved Microsoft Managed Partner, an exclusive level comprised of the top 2% of Microsoft Partners. As an elite partner, Microexcel has early access to exclusive programs on product innovation, training and certification and promotional plans that enable us to pass additional cost savings on to customers. Flexible delivery models that include on-shore, off-site, off-shore or hybrid, allows Microexcel to align each engagement with the individual needs and budgets of our customers, further maximizing business performance and ROI.

With deep industry and business process expertise, over 1500 global employees and a proven track record of excellence within the Microsoft technology stack, Microexcel is the right partner to help our customers utilize innovation in their digital transformation journey. We have the expertise to help you plan, adopt, manage, and embrace your investments of the Microsoft Cloud suite, across the enterprise, to further harness the powerful process automation features of the robust suite. These capabilities can be applied to business processes such as compliance, HR on-boarding, and automating accounts payable. The applications are vast and the benefits are boundless.

Leverage Microexcel's Extensive Microsoft Portfolio of Services and Solutions:

ME Cloud

- ▶ Pre-packaged bundled plans for Microsoft Cloud solutions with flexible licensing and billing, easy transition to cloud, storage, smooth integration and 24x7 dedicated support. Customization of the plans is also available.

Envisioning and Roadmaps

- ▶ Cost benefit evaluation of on-premise, cloud, or hybrid options
- ▶ Needs assessment
- ▶ Deep architecture performance and environment review
- ▶ Recommendation and planning report that includes versioning and future architecture/environment needs

User Experience

- ▶ Simple, rich and elegant designs to optimize the user experience
- ▶ Leverage responsive frameworks for a fluid experience

Migrations (Communications, Messaging, and Infrastructure)

- ▶ Infrastructure assessments, performance evaluation and storage recommendations
- ▶ Configure and installation of Lync on-premise and Office 365
- ▶ Intra Forest and cross Forest Active Directory implementation and migration using ADMT 3.2 or Quest AD migration tools
- ▶ Exchange implementation and migration from Exchange 2003 to Exchange 2010/2013, native tools / Quest Exchange migration tools
- ▶ Application development for powerful, touch-friendly mobile apps

Custom Business Solutions

- ▶ Application design and development
- ▶ Database design and development
- ▶ Custom software development
- ▶ System study and analysis
- ▶ Data analysis and security
- ▶ Cloud analysis and migration
- ▶ IT infrastructure support and administration

Business Intelligence

- ▶ Aggregate data from Excel, Oracle, SAP, SQL Server, Exchange, SharePoint and other line of business systems
- ▶ Leverage SQL Server integration services to create relational data warehouses to expose the line of business data to business users
- ▶ Take advantage of SQL Server 2012 and Excel 2013 to deliver tabular data models and use PowerPivot and Power View to bring total control to your end users

- ▶ Deliver rich reporting using SQL Server Reporting services both as a standalone reporting engine and integrated with SharePoint

Managed Services and Support

- ▶ Bronze, Silver, Gold packages for 24x7 coverage
- ▶ High quality and cost effective administrative and user support
- ▶ Customized services and ad hoc support available

Focused Technologies

Productivity, Collaboration and Cloud

Dynamics 365

- ▶ Dedicated Dynamics practice helps extract the most value from Dynamics on-premise or cloud
- ▶ End-to-end services for Dynamics with highly scalable and affordable packages for medium to large sized enterprises

Office 365

- ▶ Office apps and SharePoint hosted and provider apps
- ▶ On-premise Exchange and SharePoint migrations
- ▶ Build and host your corporate public websites in SharePoint Online

SharePoint Online

- ▶ Design, deployment, and system integration
- ▶ Portal development and support: intranet, extranet, corporate internet sites
- ▶ Document management
- ▶ Custom solutions that leverage features out-of-the-box such as rich forms and workflows

Azure

Whether you're simply looking for a Windows Server 2012 VM to extend your Active Directory to the cloud, or if you need to provide a scalable version of SQL Server 2014 Enterprise, Deploy Dynamics AX 2012 R3, or even deploy a full three-tier high-availability SharePoint 2013 Farm, Azure Virtual Machines make it easy.

- ▶ Infrastructure-as-a-Service (IaaS) - Robust data centers, Azure virtual machines, and general computer performance make it a reliable host
- ▶ Platform-as-a-Service (PaaS) - Secure and flexible development and deployment options with Web Apps, scalable and managed relational databases with Azure SQL databases, Blob/Table/and Queue cloud storage accounts, Big Data solutions with HDInsight and Machine Learning

Project Online

- ▶ Delivered through Office 365, Project Online enables organizations to get started, prioritize project portfolio investments and deliver the intended business value from virtually anywhere on nearly any device.
